

We specialize in Water Access Only properties and islands. Along with our competent full time all year round staff, we have the vessels and equipment to get the material and staff to and from your island. Our four custom aluminum work barges, ranging in length from 18 to 28 feet, we can haul everything required safely and quickly to your property.

We believe having a home or cottage on the water requires a dedicated fleet of properly equipped vessels and a seasoned staff to get the job done. We've been doing it for almost twenty years!!
